Sustainable Schools, Sustainable Futures: A Resource for Teachers

DAVID HICKS

Worldwide Fund for Nature UK (2010)

Part 1 – Learning for Tomorrow

1. Unsustainable times
2. The global dimension
3. A futures perspective
4. Sustainable schools
5. Transition times

Part 2 – Stories from the Future

6. Food and farming
7. Energy and water
8. Travel and transport
9. Spending and consuming
10. Buildings and biodiversity
11. Inclusion and participation
12. Local well-being
13. Global connections

Part 3 – A Journey of Hope

14. Building a resilient future
15. Teaching in a spirit of optimism

This is a practical book for teachers working at key stage 2/3 which sets out the nature of a more sustainable future and the ways in which this can be explored and realised in schools. The book's uniqueness lies in the following key elements:

- Combining the global dimension, futures thinking and sustainability in schools
- A sustainable 2050 scenario for each of the eight 'doorways' to sustainability
- Emphasis on engaged optimism through practical envisioning and action
- There is no other similar book in existence for teachers
